About SCC

Supply Chain Council (SCC, supply-chain.org) is a global nonprofit organization whose methodology, diagnostic, and benchmarking tools help member organizations make dramatic and rapid improvements in supply chain processes. SCC has established the supply chain world's most widely accepted framework for evaluating and comparing supply chain activities and their performance. The framework—the Supply Chain Operations Reference (SCOR®) model—helps organizations quickly determine and compare the performance of supply chain and related operations within their company or against other organizations.
